A comprehensive solution against the problem of counterfeit distribution

- In the wholesale trade and retail: detecting and prosecution of IP violators, receiving of financial compensation;
- We are ready to implement a project to clean the Russian retail market from counterfeit goods on a success fee basis, when the compensation received from IP violators covers the cost of our services. The rest of the compensation amount can be paid to the IP holder;

- On the Internet, work to prevent the illegal use of trademarks,copyrights and the distribution of counterfeit products as well as illegal digital content;
- Internet monitoring and clean-up require some funding from the customer because, due to the specifics of the Russian law, it is more about urgent block of illegal links, rather than getting compensation;

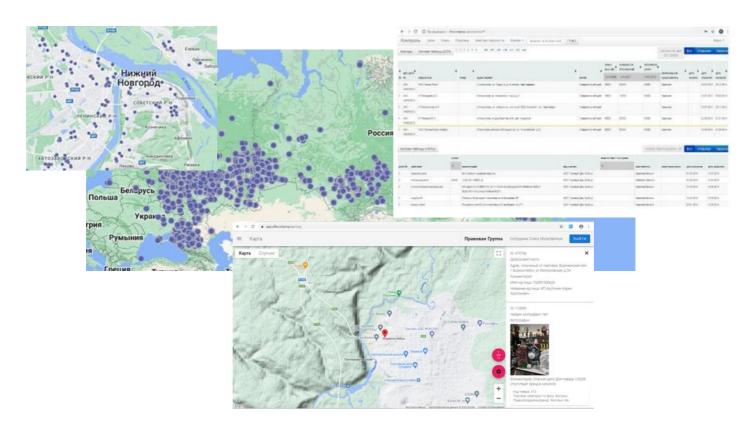

WHAT YOU GET AS A RESULT:

- Building of a strong public opinion that "BRAND IS PROTECTED": that infringement of the client's exclusive rights is unacceptable;
- Creation of strong public understanding: The amount of the financial risks borne by a potential IP violator is higher than any possible profit. Distributing of counterfeit goods becomes economically unreasonable;
- A dozens-fold decrease in the share of counterfeit products in the market to the minimum allowable limits;
